## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites 4,4'-dithiobis(2,2-dimethylpropyl)-3-aminobutane-1-sulfonate; however, the claim is indefinite as it is unclear what the sulfonate (sulfonic acid salt) is derived from, i.e., a metal, an organic acid, such as an acetate. It would be unclear to a person having ordinary skill in the art if a sulfonate ester would be included in the definition of said compound. Claims 2 and 3 depend from claim 1 but do not clarify the issue and therefore, are likewise rejected.

Claim 4 provides for the use of a compound according to claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 4 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35

Art Unit: 1621

U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al (J. Med. Chem., 1998 [cite. No. AD, form 1449]).

Martin et al disclose the disodium salt of 4,4'-dithiobis (3-amino-1-butanefulfonic acid) as one potential inhibitor of zinc metalloproteinase activity of tetanus toxin light chain; see CAPLUS document no. 1998:505738.

The examiner would like to point out that the specification is missing the heading, "Brief Description of the Drawing". Proper correction is requested.
